Above and Beyond Information

Our preschool curriculum prepares the children for kindergarten; the Above and Beyond classes teach them more than they need to know. They don't need to read words (Reading Club), read math sentences or understand animal habitats (Math and Science), know how to dehydrate kale to make chips (Cooking Club) or know how to take abstract ideas to form (Art Club), but they are certainly capable of learning these skills. Above and Beyond classes are listed on the reverse side and are offered to Wings Students first and at a discount. Registration for "Above and Beyond" programs (Reading, Art, Cooking and Math & Science) is ongoing. Please circle the Above and Beyond classes on the back of this sheet if you would like to enroll.
